Further Information

The NRC is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

DG-1271 is proposed Revision 1 of Regulatory Guide 1.184, "Decommissioning of Nuclear Power Reactors," dated July 2000. This proposed revision of Regulatory Guide 1.184 describes a method that the staff of the NRC considers acceptable for use in complying with the NRC's regulations relating to the decommissioning process for nuclear power reactors.

Backfitting and Issue Finality

As discussed in the "Implementation" section of DG-1271, the NRC has no current intention to impose this regulatory guide on holders of current operating licenses or combined licenses. Accordingly, the issuance of this regulatory guide would not constitute "backfitting" as defined in Title 10 of the *Code of Federal Regulations* (10 CFR) 50.109(a)(1) of the Backfit Rule or be otherwise inconsistent with the applicable issue finality provisions in 10 CFR Part 52.

This regulatory guide may be applied to applications for operating licenses and combined licenses docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications for operating licenses and combined licenses submitted after the issuance of the regulatory guide. Such action would not constitute backfitting as defined in 10

CFR 50.109(a)(1) or be otherwise inconsistent with the applicable issue finality provision in 10 CFR Part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in Part 52.

Dated at Rockville, Maryland, this 2nd day of February, 2012.

For the Nuclear Regulatory Commission.
